EXCELLENCE ADHESIVE TAPE

INNOVATIVE, COMPETITIVE,
PRINTABLE, PVC FREE.

STRONG RESISTANCE

Extremely conformable Natural Rubber adhesive system provides strong and lasting bonds, even in the most demanding applications to ensure secure carton closure. Ideal for critical applications on highly recycled cartons too, rough or extremely smooth cartons, heavily inked cartons, as well as in dusty and/or humid environments.

HIGH THICKNESS

The tape has a support made up of 35µm of plastic film.

SILENT

Silent unwinding for less workplace noise and easy application.

WRITABLE

The Excellence Tape's backing is directly writable and readily accepts inks from most pens.

PRINTABLE

Excellence's patented backing allows direct printing without corona treatment and without having to use a final release agent, thus reducing material and energy costs and offering improved productivity and throughput, thereby increasing overall equipment effectiveness (OEE). Excellence can be printed with Polyamide Inks.

EXTREMELY CONFORMABLE

The 35µm flexible and conformable backing provides less rigidity and allows better adhesive contact and adhesion to cartons.

ENVIRONMENT FRIENDLY

Excellence is a PVC free carton sealing tape that meets the important sustainability needs defined by your company's commitment to the environment, as well as your company's commitment to the global community.
